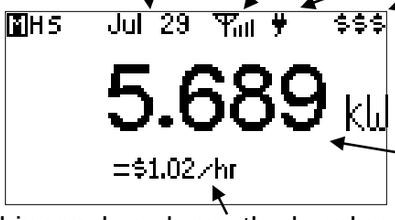
In-Home Display - Quick Reference Guide

Main View: How much electricity am I using now?

Shows which view you are looking at: **M**ain, **H**istory or **S**ummary.
Press ► to go to the next screen.

Today's Date **Signal Indicator** **AC** or **Battery** operation

Electricity cost indicator for time-based pricing: $ - lowest cost rate in effect (or no time-based pricing) $$$$ = highest cost rate



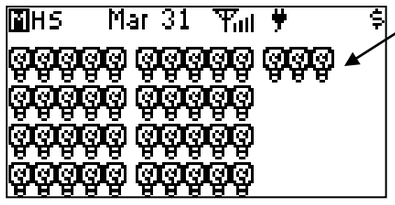
- *The **Main** view is the first to display upon power-up after synchronizing to your smart electricity meter.*

The number displayed or the number of light bulbs shows how much electricity you are using now.

This number shows the hourly cost of electricity for your current rate of consumption

Press ▲to view your Electricity usage in *Light Bulbs*

Each light bulb = **100W**



When more than 60 light bulbs are required, the display changes back to numbers

History view: How much electricity did I use in the last 24 hours, 7 days or 30 days?
